SUBJECT: Voice Message System

1. The Defense Switched Network/AUTOVON Operations is considering offering a computerized voice mailbox system as a service for government telephone subscribers. The mailbox system would be a computerized voice store and forward message retrieval system with world-wide access via AUTOVON, FTS and WATS. Subscribers to this system would be assigned a voice mailbox into which messages from both subscribers and nonsubscribers could be deposited. Each subscriber would also be able to access his mailbox from any phone and retrieve messages by dialing his identification and mailbox numbers.

2. Initially, DCA is considering procuring a single system for installation in CONUS. As demand increases, the system could be networked by installing similar systems in various locations around the world. The networking capability will allow for messages to be stored in one system and forwarded to another at a predetermined time. For example, subscribers in Europe could deposit messages destined for CONUS in a European system, the networking capability would allow the European system to forward messages to CONUS at a time when trunk traffic is low.

3. The cost for this service will depend on the number of subscribers, the access line cost, and the procurement cost. During the initial 3 year period when the procurement funds must be reimbursed to the CSIF, the cost is estimated to be \$4-\$8 per month for each subscriber. The cost after the 3 year pay-back period will be reduced to maintenance and access line cost.

4. Request addressees reply to DCA Code B683 within 15 days of receipt of the letter with the following information:

- a. Level of interest within their department.
- b. Estimate of the number of subscribers.
- c. Location of subscribers and whether use of the system would be within a local calling area or long distance.
- d. Interest in attending a demonstration of a system.

DCSO Ltr, B683, Voice Message System

5. Currently, one vendor has demonstrated his system's capabilities and has loaned voice mailboxes to several Government Agencies including DCA, NOAA, AFCC, and DTS. The response to the pilot test program has been overwhelmingly favorable. If you desire further information or have any questions, my point of contact is CPT Susan Galib 202-696-5764, VON 226-5764.

B. G. OAKS
Program Manager
